GENERAL INFORMATION PERTAINING TO WATER RIGHTS IN CALIFORNIA

There are two principal types of surface water rights in California. They are riparian and appropriative rights.

A riparian right enables an owner of land bordering a natural lake or stream to take and use water on his riparian land. Riparian land must be in the same watershed as the water source and must never have been severed from the sources of supply by an intervening parcel without reservation of the riparian right to the severed parcel. Generally, a riparian water user must share the water supply with other riparian users. Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or to divert water which originates in a different watershed, water previously stored by others, return flows from use of groundwater, or other "foreign" water to the natural stream system.

An appropriative right is required for use of water on non-riparian land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus not needed by riparian water users. After the formation of the California Water Commission back on December 19, 1914, new appropriators have been required to obtain a permit and license from the State. Appropriative rights can be granted to waters "foreign" to the natural stream system.

Statements of Water Diversion and Use must be filed by riparian and pre-1914 appropriative water users as set forth in Water Code section 5100 with specific exceptions. The filing of a statement (1) provides a record of water use, (2) enables the State to notify such users if someone proposes a new appropriation upstream from their diversions, and (3) assists the State to determine if additional water is available for future appropriators.

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office. We have several pamphlets available. They include: (1) Statements of Water Diversion and Use, (2) Information Pertaining to Water Rights in California, and (3) Appropriation of Water in California.

- G.1.a. The District is currently implementing water conservation best management practices, including all urban measures reported in our Urban Water Management Plan 2005 Update; and all agricultural measures reported in our USBR Five-Year Water Management Plan Update.
- G.1.b. Reduction/substitution volumes are District-wide and not attributable solely to this right.

STATEMENTS OF WATER DIVERSION AND USE NOS. S015937 THROUGH  
S015940 FOR DIVERSION FROM UNNAMED STREAMS TRIBUTARY TO SOUTH  
FORK AMERICAN RIVER IN EL DORADO COUNTY AND S015941 FOR DIVERSION  
FROM CAPLES LAKE TRIBUTARY TO CAPLES CREEK IN ALPINE COUNTY

A recent review of the Division of Water Right's (Division) records indicates that you might not have received acknowledgement of your Statements of Water Diversion and Use (Statements) received on January 3, 2006. Your Statements have been assigned identification numbers S015937, S015938, S015939, S015940 and S015941. These numbers should be referenced in all correspondence with the Division regarding the Statements. Please notify the Division of any change in ownership or mailing address.

A Supplemental Statement of Water Diversion and Use (Supplemental Statement) will be mailed to you every three years, and must be filed with the Division prior to July 1 of that year. There is no fee for filing a Supplemental Statement. The submittal of a Supplemental Statement is a record of your water use. It is used by the Division to verify existing data and to notify you of water right matters related to your [riparian, pre-1914] claim.

If you have questions or concerns regarding this matter, please contact me at (916) 341-5376 or at [brigby@waterboards.ca.gov](mailto:brigby@waterboards.ca.gov).
